B.S. Information Systems Management
A.S. Electronic Systems Technology

SFSU | Anticipated Graduation Spring 2018
Community College of the Air Force | 2015

Work Experience

Project Manager for Exercises, Plans, and Programs
USAF, 726th Air Control Squadron

January 2015 - January 2016

Hand-selected for 3 person cross-functional team tasked with preparing 300 employees and \$104 million in equipment for [Exercise Red Flag](#) on a one year timeline.

- **Strategic Planning** - Designed and executed 9 network training exercises. Ensured compatibility across multiple information systems (voice, satellite, radio, and IP) and presented executives with a flexible range of budgetary options. Culminated in the first-ever successful integration of Air Control Squadron capabilities in Exercise Red Flag.
- **Program Management** - Developed monthly driver training program; scouted 600 mile route, with 8 heavy trucks per convoy. Arranged fuel and meal funding and approval from outside agencies. Qualified 192 employees with a 100% success rate.
- **Security Compliance** - Vetted physical locations for compliance with Air Force INFOSEC, OPSEC, and EMSEC standards. Retrofitted buildings to ensure safe transmission of Secret level data. Experienced with a variety of cryptographic devices and standards.
- **Project Management** - Launched 5.5k item company-wide equipment inventory. Completed 2 weeks ahead of schedule, secured \$230k funding to resolve 2 year inventory shortfall.

Radio Frequency Transmissions Systems Supervisor
USAF, 726th Air Control Squadron

November 2012 - January 2015

Managed maintenance and inspection of \$10M of satellite, radio, and microwave equipment while implementing training and qualifications program for a four person maintenance and inspection team.

- **Management** - Mentored 3 employees on their path to technical proficiency, ensuring they exceeded all training goals months ahead of schedule.
- **Process Optimization** - Rewrote 300 pages of technical documentation and implemented procedures to streamline maintenance; reduced maintenance time by 75%.
- **Creative Problem Solving** - Negotiated with service provider to implement novel equipment configuration, reducing equipment overhead and simplifying architecture during critical infrastructure upgrade.
