Education

(In Progress) B.S. Information Systems Management	Spring 2018	SFSU
A.S. Electronic Systems Technology	Community College of the Air Force

Work Experience

Project Manager for Exercises, Plans, and Programs   January 2015 - January 2016
USAF, 726th Air Control Squadron
Hand-selected for 3 person cross-functional team tasked with preparing 300 employees and $104 million in equipment for Exercise Red Flag on a one year timeline.

- Strategic Planning - Designed and executed 9 network training exercises. Ensured compatibility across multiple information systems (voice, satellite, radio, and IP) and presented executives with a flexible range of budgetary options. Culminated in the first-ever successful integration of Air Control Squadron capabilities in Exercise Red Flag.
- Program Management - Developed monthly convoy training program; scouted 600 mile route, with 8 heavy trucks per convoy. Arranged fuel and meal funding and approval from outside agencies. Qualified 192 employees with a 100% success rate.
- Security Compliance - Vetted physical locations for compliance with Air Force INFOSEC, OPSEC, and EMSEC standards. Retrofitted buildings to ensure safe transmission of Secret level data.
- Project Management - Launched 5.5k item company-wide equipment inventory. Completed 2 weeks ahead of schedule, secured $230k funding to resolve 2 year inventory shortfall.

Radio Frequency Transmissions Systems Supervisor   November 2012 - January 2015
USAF, 726th Air Control Squadron
Managed maintenance and inspection of $10M of satellite, radio, and microwave equipment while implementing training and qualifications program for a four person maintenance and inspection team.

- Management - Mentored 3 employees on their path to technical proficiency, ensuring they exceeded all training goals months ahead of schedule.
- Process Optimization - Rewrote 300 pages of technical documentation and implemented procedures to streamline maintenance; reduced maintenance time by 75%.
- Creative Problem Solving - Negotiated with service provider to implement novel equipment configuration, reducing equipment overhead and simplifying architecture during critical infrastructure upgrade.
